Instructions for participants

Oral presentations

The schedule in the program follows Lisbon time.

Participants must join the session in advance (5 minutes before the start), enter their paper number and name, and follow the instructions from chairs. We highly recommend participants to check their internet connection before the session start and to install the desktop Zoom app or use the online version of Zoom in advance.

Each session has 1 hour and 45 minutes, time per one presentation is 15 minutes. The discussion part should last at least 15–30 minutes and it should be done at the end of each session.

Speakers are asked to share their screen with presentation and stop sharing at the end to allow chair to guide the discussion part.

We kindly ask participants to mute their microphones when not speaking.

There is no template for the presentation. The authors are free to make the presentation with their own PowerPoint.

Thank you very much for helping us to make the conference a success!
